

Sonozaire Ozone Generators

The Sonozaire Odour Neutralizers are industrial ozone generators. They produce ozone electronically from oxygen in the air. Ozone is an activated form of oxygen that oxidizes odour molecules and reduces them to odorless compounds. They are used in numerous applications to control and destroy organic odors. All Sonozaire models have an adjustable ozone output level to allow maximum output for short treatments, or lower levels for longer treatments or continuous use. These models are designed for use in uninhabited locations, unless used with control methods to limit the ozone level to OSHA or EPA limits. There are many uses for the Sonozaire Odor Neutralizers. Please contact us for applications and selections to meet your requirements.

105A

*Eliminates Odours
Electronically.*

Operates Unattended.

Heavy-Duty Construction.

Uses No Chemicals.

Ozone Reverts to Oxygen.

Rapid Removal of Odors.

Retards Bacterial Growth.

Quick and Easy to Install.
