

# SALT MIST TWO STAGE AIR FILTER

The *Salt-Mist* air filter provides a pre-filtration pad and final pleated filter in one frame. The wide selection of pre-filter pads are placed in front of the final filter to suit the application. The two-stage design is completed with a high performance extended surface pleated filter as the final filter. The pleated filter has a media area of one square metre based on a 600 square filter. This filter has a durable and rigid aluminium frame and is available in wide range of sizes. The *Salt-Mist* filter can be used as a stand alone filter or for more sensitive applications, used a pre-filter to a more efficient separate final filter, such as an Opakfil F8.

■ ***Pre and Final in one Frame.***

■ ***Durable Rigid Aluminium Frame.***

■ ***Suitable for Moist - Damp Conditions.***

## TYPICAL APPLICATIONS

- \* Compressor Intakes
- \* General Industrial
- \* Generator Intakes
- \* Computer Rooms
