

CLEANABLE ELECTROSTATIC AIR FILTERS

These filters are made of **electrostatic** fabric media, which draws in and traps airborne particles. The **electrostatic** force is enhanced by air flow. As dust, pollen, lint and dirt particles approach this **electrostatic** field they are attracted onto the fabric media much like iron filings attracted to a magnet.

The units are **cleanable** and **durably constructed** for a long life with a **very low pressure drop**. Standard and custom sizes available with either a flexible vinyl, galvanised or aluminium edge, single and multiple layers.

FLEXIBLE VINYL EDGED

ALUMINIUM FRAMED

Air Filters Designed for Specific Needs

- Window / Wall Air Conditioning Filter
- Domestic Ducted Air Conditioning Filter
- Electronic Air Cleaner Pre and After-Filters
- Induction Unit Filter
- Air Cooled Condenser Screen
- Industrial Pre Filter
